Only numbered Service Parts are available.

This diagram shows an exploded view of a mechanical assembly. The main component is a large, rectangular metal frame with various internal structures and mounting points. Callout 501 points to several small, rectangular components that appear to be mounting brackets or spacers, located at various points along the top and bottom edges of the main frame. Callout 502 points to a cylindrical component, likely a motor or actuator, which is shown positioned to be mounted onto the right side of the main frame. Callout 503 points to a long, rectangular component with internal structural details, which is shown positioned above the main frame, likely representing a cover or a secondary structural member. The diagram uses dashed lines to indicate the assembly path and alignment of the components.
